The murders of fascism cannot stop the guerrillas!

We pass through the gates of sacrifice!

We will let the people's enemies get their deserved punishment!

The workers, women, youth, the dispossessed and those who are condemned to a life of hardship!

The racist, fascist, rapist and torturing police of the fascist ruling regime has murdered two of our comrades, two indomitable guerillas, in Eskisehir. The two MLKP members, the FESK commander Comrade Ozan Sökmen and the FESK guerilla fighter Comrade Fırat Şeran once again decided with their blood, „either freedom or death“. They have added another element to the practice tradition that Yeliz and Sirin showed when they were surrounded in their base.

Comrades Ozan and Fırat filled the brief period of their lives with a limitless way of life, until it came to an end with immortality. In their fight for the revolution, it has taken them from Istanbul to Sindjar and from İzmir to Rojava. They left their mark on the Hüseyin Demircioğlu Academy, where they prepared for the war. After that, they returned to Istanbul to overcome the hurdles on the development and strengthening of the urban guerilla movement. They have gone to war with great determination, full of self-sacrifice, fearlessness and with a kind of creativity worthy of guerrilla fighters. Most recently, they have taught our enemies to

fear and have opened up new opportunities in our work with a sabotage action on May 16 in Antalya, even though it failed to achieve its ultimate goal due to technical reasons. With the action in Adana, the fear among the murderous droves of fascism has increased. Thus, Suleyman Soylu, world champion of bragging and rabid fighting dog of the palace, continues to cover up the blow that the torturers, executors of extrajudicial judgments, rapists and popular enemies called “special units” had to take in Adana and spreads lie upon lie.

Ozan Sökmen, the Deniz Erbay of his comrades and known as Diren Güney in Rojava and the mountains of Sindjar, was born in 1991 as the child of a Kurdish and Alevite family in Istanbul. When he attended the last grade of the secondary school in 2010, he joined the ranks of KGÖ in Istanbul. He participated in the work of the militia for a short time. After school, he continued to take on revolutionary tasks of the party. In response to the needs of the revolution and the call of the party, he spent a year outside Istanbul. From the time he joined the ranks of the KGÖ against fascism, colonialism and capitalism, he had the claim to join the Political-Military Front. He did not want

to do give up announcing it.

He reached his aimed goal of defending the revolution in autumn 2014, when he took over responsibilities in Rojava. In Rojava he fought with great determination and full of energy on various fronts in the fight. He was also part of the party unit that had participated in the war for the liberation of Sindjar. These days he has called out full of enthusiasm:

"As a fighter of our party, I am in Sindjar and I am proud of it. We have been sent here by our party according to the line of our Party program, to prevent the massacre of our Yezidi people. We have the honor to carry the struggle of our party to the mountains of Sindjar. We are continuing our fight - in Kobanê as in Rojava as in Sindjar. Right now we are continuing to work for the liberation of Sindjar.

We have now reached the center of Sindjar. As soon as Sindjar is liberated, we will continue to spread this fight everywhere."

Despite the traps of fascism and imminent massacres, Ozan Sökmen, the Diren of his comrades, had overcome any obstacle to get to the FESK, after his time in the self-sacrificing war and in the Hüseyin Demircioğlu Academy. In various cities he worked for the guerrilla. He had stood out as a determined, courageous communist guerrilla fighter with a clear will and strong adaptability to urban guerrilla conditions. He took part in various actions that have given the enemy sometimes severe blows and sometimes did not achieve their goal due to technical defects. With his development, he had the honor of becoming a FESK commander. The Red Detachment worked under his command with a spirit that did not retreat from any obstacle of the enemy.

Fırat Şeran, the Azad Serhildan of his comrades, was born on April 9, 1988 in Urfa-Viranşehir into a family belonging to the Kurdish-Sunni people. In 2007, at age of 19, he joined the ranks of the party in Istanbul Esenler. Even before that, he had already joined the organi-

zed political struggle as a student. In the 12 years in which he fought in the ranks of the party, he fulfilled various revolutionary tasks in Istanbul, Kocaeli and Izmir. In June 2012, he was captured in underground work in Istanbul. After two years in prison, he immediately plunged into the struggle again. After a period of youth work, he announced his desire to participate in political-military work. He was in the Hüseyin Demircioğlu Academy to prepare for the war. He participated in the defense of the Rojava revolution. He moved from the free areas to the cities of Turkey, overcoming all obstacles of the enemy to participate in the FESK urban guerrilla warfare. The Red Command, in which he had taken his place, fought with great discipline and self-sacrifice in order to beat the enemy.

Under the increasing difficult conditions of urban guerrilla, comrades Ozan and Firat, who gave their lives to rekindle the outcry of the working class and the oppressed, and who upheld their spirit of self-sacrifice to uphold the calls of the Immortals, to follow the revolution and the party's revolutionary actions, made tireless efforts under the same conditions for ideological-political and technical develop-

ment. The memory of the two party members and brave guerrillas, the two indomitable FESK fighters, will be filled with life; we will not stop letting the fascist colonialist enemy pay their price.

We call again on the laboring people and the oppressed, especially the workers and students among them, to strengthen the FESK. Let's provide information and weapons for the FESK. Let's join their ranks and fight.

Comrades Ozan Sökmen and Firat Şeran live, the MLKP fights!

Forward on the path of the immortals!

Glory to the Fesk! Glory to the Communist Guerrillas!

We will definitely hold the fascist murderers to account!

MLKP

Central Committee

Workers, Women, Youth And Poor Thirsty For Justice!

FESK

The Armed Forces of the Poor and the Oppressed

The fascist chief-regime managed to outpace all the previous fascist regimes regarding its hostility against the laboring and oppressed. To build up its power the regime is totally dependent on carrying out a fascist psychological war through state terror and lies. The regime is even afraid of the most basic democratic rights. Meetings, rallies, demonstrations, events, artistic and cultural activities, even publications of the press are being attacked by the police of the palace and prohibited by governors, who are following the orders of the fascist chief.

When the regime does not manage to change the general or local election results by ballot rigging and forgery, by repeating the elections or with the help of the high election committee, it simply replaces the elected persons with trustees. Workers and oppressed, who de-

mand the right of speech, press, assembly, organization and action, are terrorized with custody, prison and being kicked out of their jobs. The army and the police of the fascist palace currently appear to be a machine made for killing and torture working around the clock.

Every honorable worker, woman, young person, laboring peasant, poor, artisan and craftsperson, intellectual and artist would agree: It becomes more necessary, urgent and inevitable every day, that the oppressed and poor defend themselves with their own military means. There has never been a fight against fascism in the world, which was successful without political-military means, because fascism is a regime built on terror and lies.

The FESK, which is carrying out the political war by military means

as a force of the defense and attack of the poor and oppressed, executed a bomb attack against the police of the fascist palace regime in Yüreğir Adana on 25 of September 2019 at 7 am. Our action in Adana, where the fascist chief-regime exerts systematic terror against the oppressed and poor and is doing very strict police controls, panicked the police.

Our action was part of calling the regime to account for Baran Serhat, Diyar Xerîb, Taylan Kutlar, Hıdır Çallı, all comrades and all revolutionary comrades who fell martyr for freedom. It was part of the resistance against the appointment of trustees; it was an answer of the workers and oppressed to fascism.

We will keep on following our

tasks inside the fights against fascism and colonialism, which we have undertaken as sacrifice-squad of revolution! We call all workers, women and youth to support the FESK and to participate in its ranks to strengthen the revolution.

The immortals live, the MLKP will be victorious!

We will smash fascism, which is raising its hands against the workers and women, the youth and the poor!

Let's unite in the ranks of the MLKP and strengthen the fight for freedom and justice!

The Armed Forces of the Poor and the Oppressed

MLKP/FESK

***HBDH: One may go, but thousands will follow!
We will take revenge on fascism!***

On 3 October 2019, at around 11.00 am, our forces carried out an action in the Çerikaya region of the Belen district of Hatay against the military unit that launched for an operation in Amanos. The vehicle of the military group was targeted with long-barreled weapons and the panicking driver of the armored vehicle lost control of the vehicle, which rolled into the abyss. Two specialist sergeants and two high-ranking soldiers were killed

in the vehicle, which fell into the abyss. Five soldiers were injured.

The fascist Erdogan regime is trying to feed on the war, massacres and to maintain its power by making occupation plans on the oppressed people. While saying 'one night, we will suddenly enter' he continues his threats to Northern Syria, and he wants to build TOKI over the peoples. It is a fact that the AKP-MHP fascism

is collapsing, but they want to realize their collapse by destroying the working class and the oppressed people.

Fascism is a mad rush and panic. The struggle of Turkey's working class and oppressed peoples scares them, as well as the existence of our militia and our united revolutionary movement. They are afraid of the Rojava revolution and freedom of peoples. They are afraid of the action that targeted the police in Adana. They are afraid of factories and arsenals set on fire. Neither the chief fascist Erdoğan nor Soylu can ease their fears. The bombs and bullets rained on peoples have started to rain on fascism now and this will continue all of a sudden, when least expected. With this fear, all the police and special operations forces have been mobilized to massacre the fighters of MLKP and other HBDH constituents. They have accelerated their operations and mass arrests against revolutionaries.

We call out to the peoples, working class, women and youth of Turkey and Kurdistan; we will tear down the AKP-MHP fascism.

Support the Peoples' United Revolution Movement from your homes, workplaces, neighborhoods, schools and everywhere you are. Mobilize anything you have against fascism.

We call out to all the opposition and socialists waging a democratic struggle; raise your voice against fascism louder. Unite your forces.

As HBDH, we have carried out this action in memory of the two communist fighters Ozan Sökmen and Fırat Şeran, who carried out a bombing operation against riot police in Adana and who immortalized heroically resisting in their base in Eskişehir. Their determination to walk on fascism, their line of sacrifice without surrender are the yeast of our united revolutionary movement.

Fascism will never get away with any massacre it has perpetrated.

Long live our United Revolution Struggle!

The Martyrs of the Revolution are Immortal!

HBDH-4 October 2019

Resistance and Serihildan everywhere!

The invasion of Northern Syria and Rojava by the colonial fascist Turkish state is a matter of time now. The dictatorship of the palace took the necessary permission from the US, whose aide it is. Previously, the Russian, Iranian and Syrian states had approved this invasion. The CHP stated that they would support this occupation policy with the Syria conference.

The forces of revolution and counter-revolution are once again confronted.

The freedom revolution of peoples in Rojava, the Rojava women's revolution, the international Rojava revolution are now going through a new process. The peoples of Rojava and Northern Syria will defend their land, honor and freedom with great resistance against the occupation. Nobody shall doubt that!

It is the most current duty of communists, socialists, revolutionaries, democrats, women, young people, workers and all oppressed to defend the acquired revolutionary position with all our strength and turning the occupation attack into a defeat of the colonial Turkish state and global imperialist powers in the region.

Just as in the Kobanê war, the peoples of Kurdistan, Turkey, Arab peoples and the peoples of the world, have to raise resistance and serihildan against the occupation and the Turkish state everywhere.

The spirit of time is resistance and serihildan!
